Apt. 2201, 221 Monticello Avenue
Williamsburg, VA 23185

Education

William & Mary, Williamsburg, Virginia

2022-2026

- BSc. Computer Science, BA. Economics
- Relevant Coursework: Software Development, Data Structures, Algorithms, Principles of Programming Languages, Understanding Large Language Models, Applied Cybersecurity, Linear Algebra, Econometrics, Principles / Methods of Statistics

Work Experience

UX Design Intern, Tata Consultancy Services

May-August 2024

- Conducted user research with supply chain stakeholders to define problem statements and translate business requirements into a configurable system specification.
- Turned stakeholder interviews into a Figma prototype with compliance acceptance criteria, enabling CTO sign-off and a scoped engineering build path; reduced early-cycle rework by 30%.
- Documented system configuration components and acceptance criteria, cutting time-to-spec by 25% and improving cross-functional handoff between research, engineering, and compliance.
- Authored and presented a white paper on system rationale and rollout plan to the CTO, aligning stakeholders across multiple functions.

Venture Capital Intern, Black Pearl Global Investments

June-July 2025

- Engineered a proof-of-concept enterprise automation system for the CIO using n8n, LangChain, and Claude, designing a scalable, configurable architecture for processing operational data and preserving data integrity across the workflow lifecycle.
- Trained senior, mostly non-technical staff on adopting the deployed workflows, building documentation, training materials, and one-on-one support for end users.
- Led the scoring and evaluation of 20+ potential investments, conducting technical due diligence on tech stacks, vendor architectures, and rollout feasibility.
- Identified and established relationships with 15+ strategic partners and 30+ limited partners, coordinating outreach and communication strategies across multiple stakeholders.

Intern, Deloitte

January 2025

- Performed market analysis on consumer behavior trends across South Asia for a major retail client.
- Delivered technical keynote to subject-matter experts and industry leaders, translating complex operational findings into clear, actionable guidance for senior stakeholders.

Organizations and Projects

Itch (web app)

2024-2025

- Developed a full-stack platform end-to-end using Node.js/Express, Svelte 5, REST APIs, and Firebase Firestore; managed deployment, testing, and post-launch operational support.

Self-hosted Server Administration

2024-Present

- Maintain a self-hosted Linux server with Tailscale, handling networking, access controls, uptime monitoring, and backups across multiple services.

Data Editor at The Flat Hat (college newspaper)

2022-Present

- Founded and scaled the Data section from inception, establishing editorial processes, prioritization frameworks, and delivery cadence to produce 20+ articles annually.
- Designed reusable reporting and visualization frameworks adopted across the publication. Region 2 Mark of Excellence Finalist (Society of Professional Journalists).

Skills

Implementation & Deployment: Enterprise Rollouts, System Configuration, Requirements Gathering, Business Process Mapping, Acceptance Criteria, User Acceptance Testing (UAT), Cutover Planning, Training & Enablement, End-User Support, Change Management, Vendor Relationship Management, Stakeholder Communication, Cross-functional Collaboration, Documentation, Project Coordination

Tools & Platforms: Jira, Confluence, Microsoft Office, Microsoft Excel, Microsoft PowerPoint, Tableau, Datawrapper, Figma, Storybook, Git, GitHub, Agile / Scrum, ITIL Concepts, Oracle Hospitality (familiar), Symphony POS (familiar)

Technical: SQL, Python, R, Pandas, JavaScript, TypeScript, Java, C++, REST APIs, GraphQL, Node.js, Express, HTML, CSS, AWS, Docker, Linux, Networking, Tailscale, Firebase, MongoDB, AI Tools, LLM Integration, Claude Code, GitHub Copilot

Languages: English (native), Hindi (native), Maithili (native), French (Intermediate)
